

## ABOUT ADAPT IT EDUCATION

In the last 20-25 years Africa has seen tremendous growth in the demand for Higher Education. The ever-growing numbers of Higher Education Institutions (HEI) both private and public, bear testament to this growth.

Globally, one of the major trends in education is the development of smart campuses on which technology helps improve the learning and teaching experience and empowers all stakeholders. At Adapt IT we understand these needs and have developed some innovative solutions to address any Higher Education Institution's needs:

### CHATBOT

Many institutions are committed to creating a smart campus, and through the chatbot offers students an easy, interactive way to obtain critical administrative information on their smart phones from wherever they are - without the need to come onto campus and queue to get information. Students can obtain their fees balance, course details, timetables and other important information on their phones. The information is available 24/7 via an easy-to-use interface.

The Chatbot also allows the University or TVET the functionality to store their FAQs and their answers, thereby limiting the need for students to contact the support Call Centre to answer their queries.

An innovation partnership with Adapt IT can assist any institution to develop and try out new ideas and it also allows end-users to be involved in the design of the solution, developing a way to facilitate greater access to information and by giving students and staff more autonomy, promises to improve their experience greatly.

### FACIAL RECOGNITION

An Interface that passes student information from ITS Integrator 4.1 to a facial recognition system and back to ITS Integrator 4.1. This development caters for both class and exam attendance and allows a user to draw reports for both.

### I-CHAIN

Adapt IT Education's ITS Integrator can interface with i-Chain for Fixed and Biological Asset Management. Specialising in Asset Management we provide Asset Management Systems and related services to meet all public and private sector requirements including verifications, reconciliation, fair market valuations and all other best practice passed by the Auditor General.

### Products and Services

- Physical asset verification
- GAAP/GRAP/MFMA/PFMA/IFRS financial tasks
- Data gathering
- Review of useful life
- Barcoding
- Review of residual values
- Asset condition assessment
- Depreciation calculations
- Reconciliation
- Impairment testing
- Fair market valuation (FMVs)
- Policies and procedures
- Financial balancing to the General Ledger
- Financial gap analysis
- Skills Transfer on Verification & Reconciliation Processes

## ITS MOBILE

The Adapt IT ITS Mobile app enables universities and colleges to provide their students with mobile access to key student and institution information via a variety of phones and tablets. It is designed to accommodate the needs of today's busy students, faculty and staff by offering features directly to students via instant access to everything from Academic Information to Campus to navigate icon-based menus.

If a student has a status that blocks the student from obtaining information from the system, this will also be applicable to the student on the ITS Mobile as per the institution rules that are enforced through the back office.

The student will benefit by accessing real time student information anytime, anywhere. Information that can be obtained include the following:

### Benefits for the student:

- Academic Admission Status
- Class Timetable
- Examination Results
- Financial Statement
- Financial Aid Status
- Progress Report
- Residence Admission Status
- Students can access key information via a mobile device, the display will depend on the capabilities of the mobile device

### Benefits for the institution:

- Improved speed and clarity of information
- Reduced enquiries and queues
- Remote access to information
- Access via cost effective student-owned device
- Benefits for the student:
  - Academic information on demand
  - Remote access to institution information
  - Low cost access in comparison with on campus transport
  - Enhanced speed and clarity

## ITS INTEGRATOR SELF SERVICE

### The Self-Service systems are branded as:

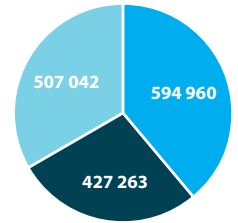

- Student iEnabler
- Personnel iEnabler
- Lecturer iEnabler
- Finance iEnabler
- Asset iEnabler
- Alumni iEnabler

The ITS Integrator Self-Service system provides online real-time access to the ITS Integrator system, enabling student / personnel of the institution to gain access through secure logons to the data applicable to the individual. The module has a user-friendly interface accessed through a web browser. Navigation throughout the Self-Service systems are user-friendly with drill-down facilities and the availability of summarized or detailed information where applicable.

## INT4.1 CLIENT ACADEMIC APPLICATIONS STATISTICS

1 456 130 academic applications processed via the ITS Integrator 4.1 system for the 2020 Academic year as at 15 November 2019.

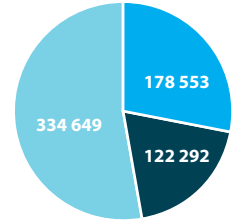

Back Office iEnabler Wizard

## INT3 APPLICATIONS STATISTICS

635 494 academic applications processed via the ITS Integrator 4.1 system for the 2020 Academic year as at 15 November 2019.

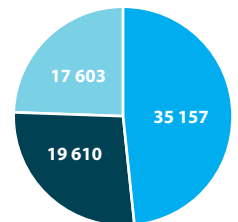

Back Office iEnabler Wizard

## TVET APPLICATIONS STATISTICS

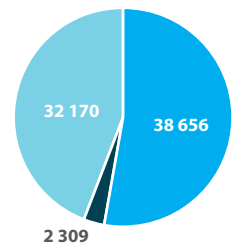

72 370 academic applications processed via the ITS Integrator 4.1 system for the 2020 Academic year as at 15 November 2019.
